

Annual Report 2024

1. Strategy

In 2024 the company focused on expanding its retail footprint in the West region and on growing the Electronics category, which remains our largest source of revenue.

We invested in a new online ordering platform and consolidated our Office Supplies vendors to reduce costs.

2. Q3 Performance

Third-quarter results were weaker than planned. Q3 revenue declined because of supply-chain disruptions at our primary laptop supplier, which left key Electronics products out of stock for most of August.

A port strike in the same period delayed furniture shipments, so many Desk and Chair orders could not be fulfilled until October.

Customer feedback in Q3 highlighted long delivery times as the main complaint.

3. Outlook and Key Metrics

Revenue recovered strongly in the fourth quarter as supply normalized. For 2025 we expect continued growth driven by the West region and by new supplier contracts that reduce dependency on a single laptop manufacturer.

The table below summarizes quarterly key performance indicators.

Quarter	Revenue (USD M)	Operating Margin (%)	Customers
Q1	4.2	18.5	1240
Q2	4.6	19.1	1310
Q3	3.1	12.4	1180
Q4	5.3	20.2	1420
